Safe Harbor Statement

This presentation may contain forward-looking statements and management may make additional forward-looking statements in response to your questions. These statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates," "confident" and similar statements. Statements that are not historical facts, including statements concerning our beliefs, forecasts, estimates and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties that could cause actual results to differ materially from those projected or anticipated, including risks related to: the risk that our results of operations may fluctuate from period to period; the risk of PRC governmental policy changes; the risk that we face intense competition from other solar companies; the risk that PRC economic, political and social conditions as well as government policies can affect our business and other risks outlined in our public filings with the Securities and Exchange Commission, including our annual report on Form 20-F.

The forward-looking statements made in this presentation relate only to events or information as of the date on which the statements are made in this presentation. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events.

Proven track record in MN, ME, NC and NY

- Focused on the development of solar projects since 2015;
- Monetized community solar project portfolios in several states;

Business growth focus on both acquisitions and greenfield development

- Project opportunities in community solar markets in MN, ME, PA and NY, with other new markets being developed;
- Pursuing utility scale projects in CA, NY, PA, IL, ME, FL and several other states;
- Pipeline expansion through early-stage acquisitions, co-development and self-originated greenfield projects.

Value drivers

- Maximize development profit through the entire project development cycle;
- Develop high quality, fully de-risked and well optimized projects.

Poland

Monetizing Our Efforts

- Sold 175 MW of projects awarded in the 2016, 2017, 2018, 2019, 2020 and 2021 auctions
- Launched a New Round of PV Farm Development and seeks Shovel-ready Projects in Poland

Recognized Name

- Leveraging this auction success, ReneSola Power is partnering with well-known utilities, EPC contractors, Investors, financing institutions and experienced developers for potential cooperation
- ReneSola Power is one of the largest project developers in Poland

Spain

Market Opportunities

- Well developed market with experienced international players; High demand for Ready to Build (“RTB”) projects on the market
- Best Solar Yield in Europe, our projects are in south of Spain -- mainly in Murcia Region > 2,000 MWh/MW per year
- Extremely competitive project financing

U.K.

Market Opportunities

- With the development of technology and gradually phase out of subsidies, solar power is increasingly able to compete against other sources of energy in U.K. market

ReneSola Power Strength

- Over 5 years of experience in the U.K. market with solar power project development
- Successfully developed 16 portfolio, operating 4.3MW projects and sold 127MW projects in the U.K.
- Cooperate with strong market players to develop 200MW pipeline in U.K.

Germany

Market Opportunities

- Market prospects are great
- Competitive financing
- High demand on RTB projects from investors
- Government announced further efforts to reach CO2 neutrality earlier – demand on faster growth of renewable energy - mainly solar and wind

France

Market Opportunities

- Ambitious national targets. Environment Minister just announced 40% RES by 2030. Annual growth of 2 GW necessary by 2023
- Consolidated market with experienced international players and high demand in Ready to Build (“RTB”) projects
- Bid systems supported by government ensure current development on restricted areas: allows PV rooftop, shade houses & ground mounted
- Easy access to financing and have competitive project financing rates
- Providing development services to big investors

Use of Non-GAAP Financial Measures

To supplement ReneSola Power's financial statements presented on a GAAP basis, ReneSola Power provides non-GAAP financial data as supplemental measures of its performance.

To provide investors with additional insight and allow for a more comprehensive understanding of the information used by management in its financial and decision-making surrounding pro-forma operations, we supplement our consolidated financial statements presented on a basis consistent with U.S. generally accepted accounting principles, or GAAP, with EBITDA, Adjusted EBITDA, non-GAAP net income/ (loss) attributed to ReneSola Power and non-GAAP EPS as non-GAAP financial measures of earnings.

- EBITDA represents net income before income tax expense (benefit), interest expense, depreciation and amortization.
- Adjusted EBITDA represents EBITDA plus discount of electricity subsidy in China, plus share-based compensation, plus bad debt provision, plus impairment of long-lived assets, plus loss/(gain) on disposal of assets, plus foreign exchange loss/(gain).
- Non-GAAP net income/ (loss) attributed to ReneSola Power represents GAAP net income/(loss) attributed to ReneSola Power plus discount of electricity subsidy in China, plus share-based compensation, plus bad debt provision, plus impairment of long-lived assets, plus loss/(gain) on disposal of assets, plus foreign exchange loss/(gain).
- Non-GAAP EPS represents Non-GAAP net income/ (loss) attributed to ReneSola Power divided by the number of fully diluted shares outstanding.

Our management uses EBITDA, Adjusted EBITDA, non-GAAP net income/ (loss) attributed to ReneSola Power and non-GAAP EPS as financial measures to evaluate the profitability and efficiency of our business model. We use these non-GAAP financial measures to assess the strength of the underlying operations of our business. These adjustments, and the non-GAAP financial measures that are derived from them, provide supplemental information to analyze our operations between periods and over time.

We find these measures especially useful when reviewing pro-forma results of operations, which include large non-cash impairment of long-lived assets and loss on disposal of assets. Investors should consider our non-GAAP financial measures in addition to, and not as a substitute for, financial measures prepared in accordance with GAAP.
